

XXX Provider Survey

Dr XXXXXXXX is conducting a survey of residents, fellows, and faculty to assess clinical approaches to the HPV vaccine series in our Family Medicine Clinic patient population. We would appreciate your participation. The survey will remain anonymous.

1. What is your level of training? Please mark an "X" in the appropriate box below. Chose only one answer.

Resident Fellow Faculty

2. Thinking back on the number of patients ages 11-26 years that you have seen in the past one month, how frequently did you review their vaccine history to assess their XXX immunization status?

I do not routinely review vaccine history (Please skip to Question 4)

I do not routinely see patients this age (Please skip to Question 4)

< 25% of the time

25-49% of the time

50-74% of the time

>75% of the time

3. What are the current CDC recommendations for who should receive the XXX vaccine series?

4. What do you say to patients when talking about the XXX vaccine, if they have not started or completed the series? Please write out your response.

5. What are some barriers you and your patients face to receive the XXX vaccine?
