CPOE: Safer Order Entry

- ▶ CPOE brings key safety functionality to the order entry process that is not possible on paper.
- ▶ Key safety features include:
 - ▶ Legible orders.
 - ▶ Clear communication of ordering provider.
 - ▶ Drug-Drug Interaction checking.
 - ▶ Duplicate Drug checking.
 - ▶ Drug-Allergy checking.
 - ▶ Clinical Decision Support.
 - ▶ Medication triggered lab order entry.
 - ▶ Faster results for lab orders.

Scope of CPOE at SVH

▶ In-Scope Units Include:

- ▶ 21S ▶ 33S
- ▶ 22S ▶ 34N
- ▶ 23S ▶ 35N
- ▶ 24N ▶ 36N
- ▶ 32S

- ▶ Because of the complexity of certain medications and therapies, certain orders will remain on **paper** indefinitely regardless of patient location.

▶ These paper orders include:

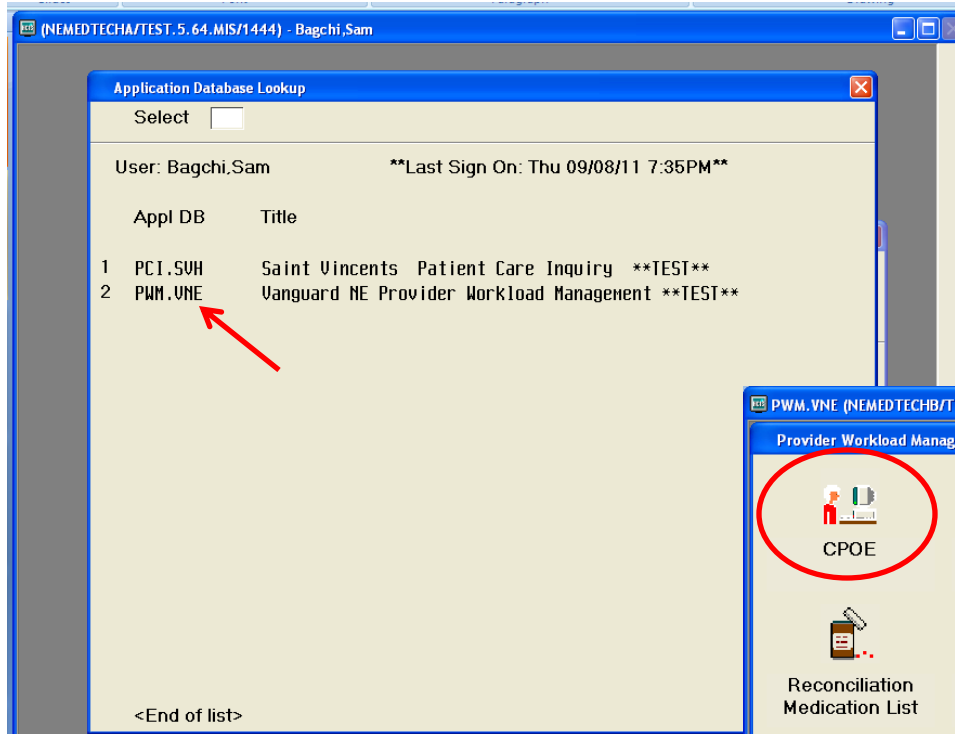

- ▶ Chemotherapy
- ▶ Transfusion reaction
- ▶ DNR/DNI/CMO (blue sheet)
- ▶ Consult orders will be entered electronically, but consult form will still be placed in chart by ordering provider to allow specialist documentation

- ▶ Several care areas are out of scope for phase I of CPOE.
- ▶ The care areas that are OUT of scope include:
 - ▶ ICU/PCU
 - ▶ Pre-Admitting Testing, Holding Area, OR, PACU
 - ▶ CWI, Pediatrics
 - ▶ Psychiatry
 - ▶ IR, Cath. Lab, Endoscopy
 - ▶ ALL outpatient areas
 - ▶ The ER will continue to use MedHost for CPOE.
- ▶ Bringing each of these units into electronic order entry is a goal of the organization, and a unit-specific plan will be developed over time to do so.

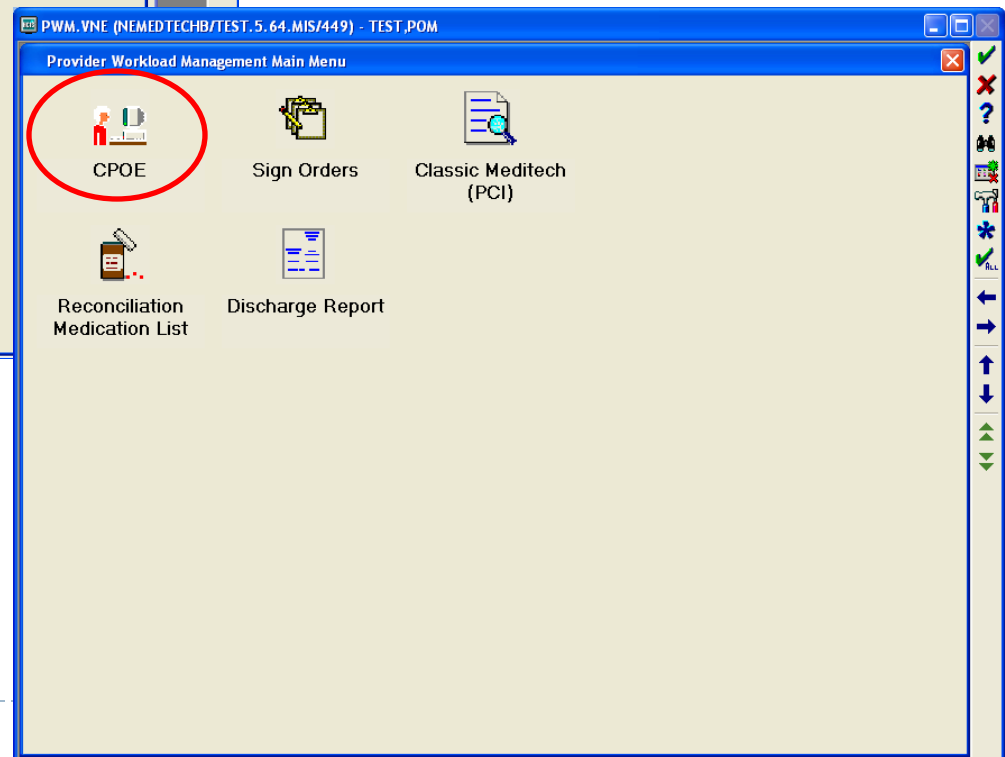

Use the F9 Key to access drop down menus on open entries. Not sure if there is a drop down menu, just click F9 to check.

Signing into Physician Desktop and CPOE

Signing into Physician Desktop and CPOE

First enter the physician desktop and by picking option #2 (Workload Management) then click on the CPOE icon

Finding Patients and Creating a Rounding List

Either click “Inpatient” if you have already added patients to your Rounding List -or- “Find Patient” to find any patient

The screenshot displays the 'Physician Care Manager' window. The title bar indicates the user is 'TEST,POM' on 'Thu, Jun 21'. The window features a header with a heart rate monitor graphic and a sidebar with navigation buttons. The main area contains a table of patient records for 'Saint Vincent Hospital'.

Navigation buttons in the sidebar include: Inpatient, Outpatient, Emergency, Workload, Covering List, My List, Cover Selection, Find Patient, Detail, and Preferences. Red arrows point to the 'Inpatient' and 'Find Patient' buttons.

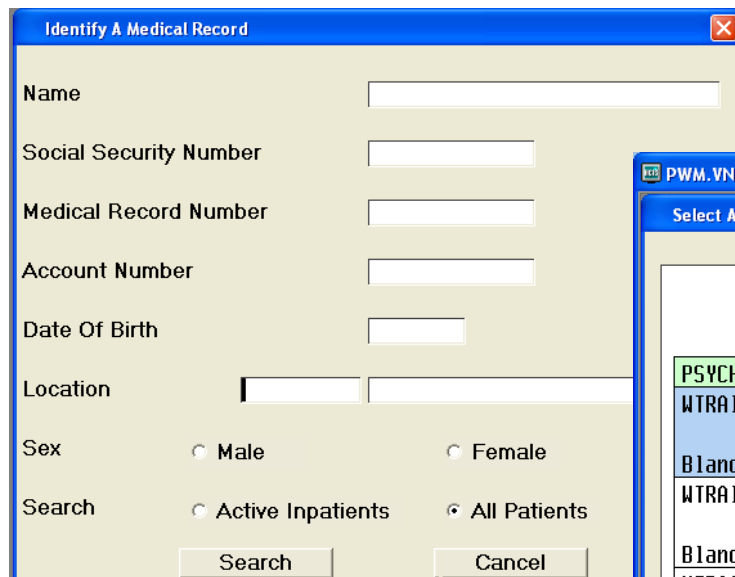

Buttons at the top of the main area: Prev Page, Next Page, Reset.

Saint Vincent Hospital			
Date/Time	Patient Name	Type	
06/21 1541	test,update	Discharge Notice	
06/18 1512	Test,Michele12	Current Inpatient Results	
06/08 0907	Test,Michele12	Admission Notice	
06/06 0814	Test,Rule	Admission Notice	
05/31 1727	Pomtest,Lindsey	Current Inpatient Results	
05/31 1727	Test,Codez	Current Inpatient Results	

Buttons at the bottom: Review, Order, Document, Sign, Log Off.

Finding Patients and Creating a Rounding List

Locate patients by any of the following:

Identify A Medical Record

Name

Social Security Number

Medical Record Number

Account Number

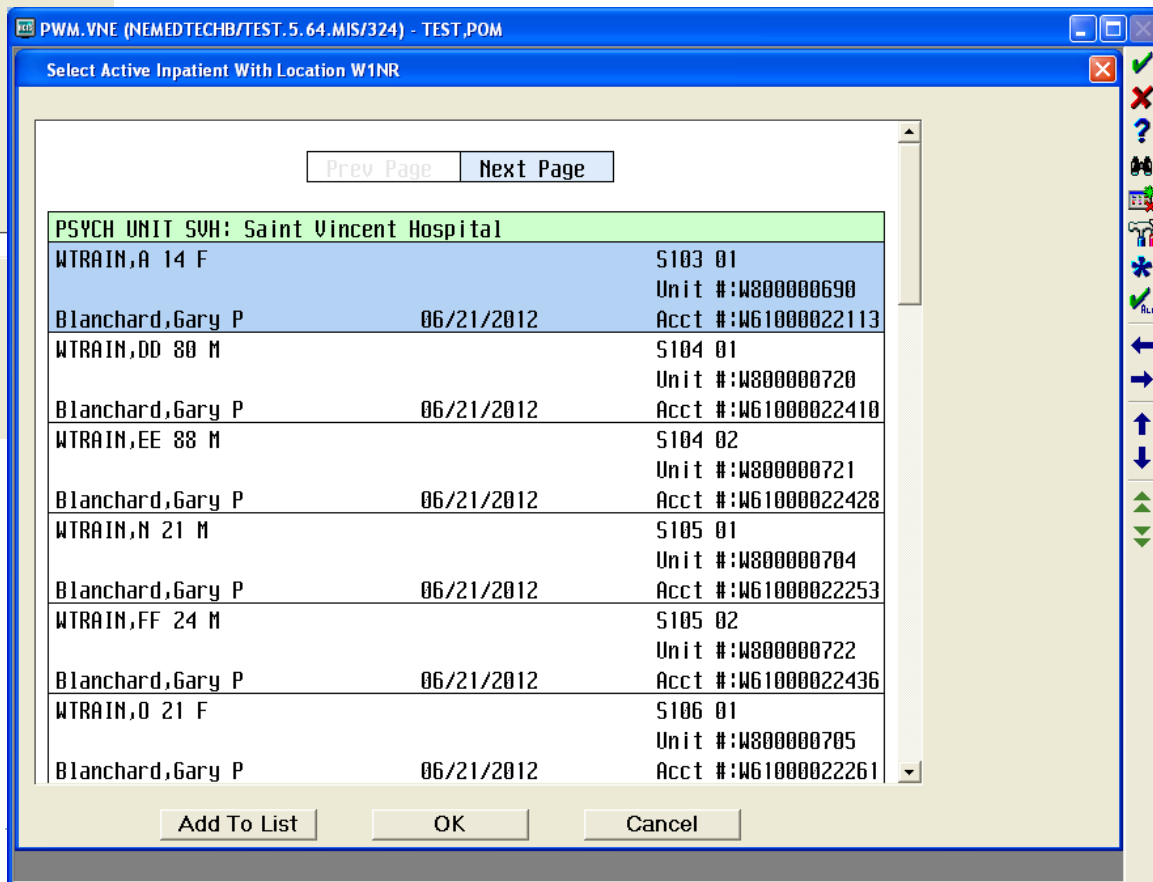

Date Of Birth

Location

Sex ☐ Male ☐ Female

Search ☐ Active Inpatients ☒ All Patients

Patients may be added to your “Rounding List” by selecting the patient then clicking “Add To List”

Click DELETE to remove erroneous allergies.

Click EDIT to change coding of allergy as needed.

Click CONFIRM to certify that the allergies listed are accurate.

Click FILE when allergy entry is complete. This finalizes the allergy and updates system.

Avoid using **Uncoded** Allergies whenever possible because the system **cannot** perform allergy, duplication, or interaction checking

Entering Allergies

To add a new allergy, click the NEW button, then search for desired allergy.
The ones that appear in the list are “Coded”

The screenshot shows the 'Allergy Management' window. At the top, there's a header bar with patient information: 'TEST CLINICAL REITER KEN - 22/M', 'DOB 08/06/84', 'ADM IN', and 'U114N 1401/01'. Below this is a sub-header 'Allergy/Adverse Drug Reaction Lookup - All'. The main area contains a table with columns 'Allergy/Adverse Drug Reaction', 'Other Name', and 'Category'. The table lists various drugs, with 'Levaquin' highlighted. Below the table, there are fields for 'Type' (Allergy, Adverse Reaction), 'Severity' (Mild, Intermediate, Severe, Unknown), and 'Verified' (Yes, No). A 'Reaction' dropdown menu is also present, with a red arrow pointing to it. The bottom of the window has 'OK' and 'Cancel' buttons.

Allergy/Adverse Drug Reaction	Other Name	Category
Lev/Pse/Gg		Multiple
Levacet		Multiple
Levalbuterol		Drug
Levall		Multiple
Levall 6		Multiple
Levall-12		Multiple
Levallorphan		Drug
Levanisole		Drug
Levaquin		Multiple
Levaquin In 05u		Multiple
Levatol		Multiple
Levbid		Multiple

Select the drug for the desired allergy.

Click Severity of allergic reaction.

Click specific reaction to drug here.

Use the F9 Key to access drop down menus on open entries. Not sure if there is a drop down menu, just click F9 to check.

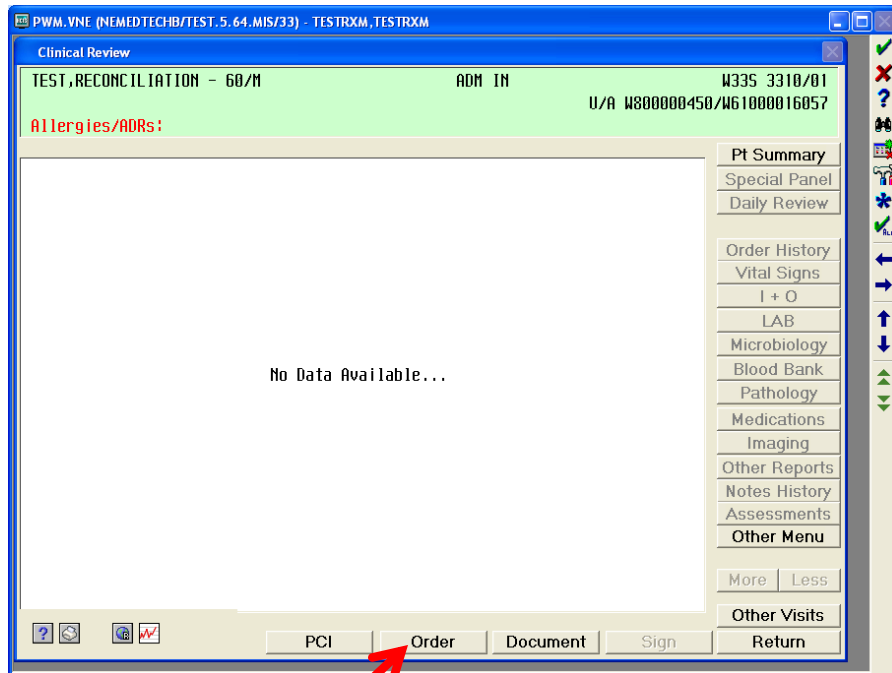

Admission Process

Updating the Pre-Admission Med List

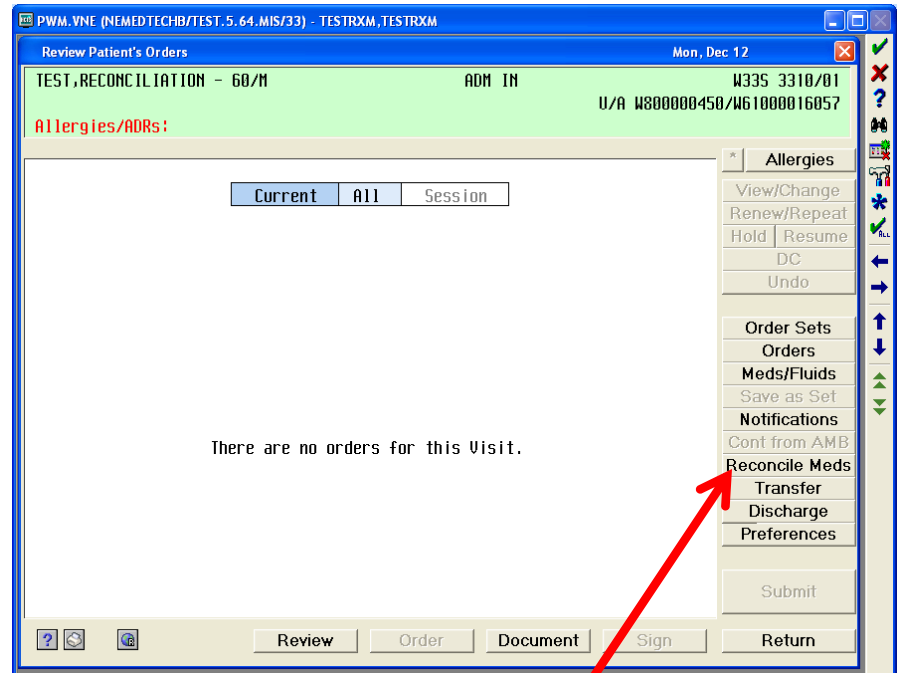

Admission Process

Updating the Pre-Admission Medication List (PAML)

After selecting a patient, click on Order, then click on Reconcile Meds.

First click on order

Then click on Reconcile Meds

Updating the Pre-Admission Medication List (PAML)

- Providers should make sure Allergies are updated first.
 - This can be done from the Reconcile Meds Screen.
- This screen will appear **blank** if patient has never had PAML entered electronically.
- If there is already a PAML in the Medication Reconciliation screen the provider can add any additional missing medications by clicking Upd Med List

PWM.VNE (NEMEDTECHB/TEST.5.64.MIS/33) - TESTRXM,TESTRXM

Last Taken Information (optional)

- The provider can enter any last taken information by clicking on <Last Taken>.
- No fields are required.

The screenshot shows a medication reconciliation window with a table of medications. A red arrow points to the '<Last Taken>' link in the 'Last Taken' column for CARVEDILOL. A dialog box titled 'Last Taken' is open, showing the medication name and dose, a date picker for December 2011, and fields for time, dose, information source, medication purpose, comments, and attention required.

Admission Process Reconciling Medications

Reconciling Meds

Two places to Reconcile Medications

- **Transfer Function-** If the admission process will utilize the Transfer function (ED admission, OR, etc.)

Most of the time you will use **Transfer** to **Reconcile Meds**

 1. Update the PAML in Reconcile Meds
 2. Then address whether to continue, suspend, discontinue or cancel meds in the Transfer routine
 3. Then click Add More to add any order sets, orders, or meds/fluids for admission orders
- **Reconcile Meds-** If the admission process will **bypass** the Transfer function (direct admissions)

This will be less likely

 1. Update the PAML in Reconcile Meds
 2. Stay in the Reconcile Meds routine to continue, suspend, discontinue or cancel meds
 3. Order additional order sets, orders, or meds/fluids from the main CPOE screen

Reconciling Meds from “Transfer”

- After all meds in the PAML have been entered, go to the Transfer routine to continue, suspend, discontinue or cancel medications.

Medication Reconciliation

Ordering Medications

Admin Time, Start/Stop Date & Time

When ordering scheduled medications, ALWAYS look at the **Directions, Start, and Stop fields**. The start date and time will always default to the NEXT scheduled time.

Admin Time:

In this example, the **09, 21** after **Q12H** indicates that the medication is to be given at **0900 and 2100** every day.

PWM.VNE (NEMEDTECHB/TEST.5.64.MIS/395) - TEST,POM

Premix medication options

To order an IV medication that is NOT an IV fluid, search under the Medication section. If there is an option for a Premix bag that matches the dose you wish to order, select that option *instead* of Inj. Otherwise, select Inj and order the dose.

The screenshot shows a software window titled "PWM.VNE (NEMEDTECHB/TEST.5.64.MIS/64) - TEST.POM". The main area is labeled "Review Patient's Orders" and displays patient information: ADMIN, TEST - 56/F, DOB 05/05/55, ADM IN, W14N 1412/01, DO NOT INTUBATE 5 ft 6 in 70.307 kg, U/A W800000058/W61000000903, and Allergies/ADRs: Penicillins. Below this, a search for "CEFAZOLI" is shown. The results are displayed in a table with columns for "Medication", "Compounds", and "Non-Formulary". The "Medication" column lists "ceFAZolin 1 GM Premix" and "ceFAZolin Inj". The "Compounds" column has "Full Formulary" and "Fluids" buttons. The "Non-Formulary" column has "Monograph" and "Lookup by Type" buttons. The "ceFAZolin 1 GM Premix" option is circled in red. At the bottom, there are "Select", "Done", and "Help" buttons.

Admin Criteria and Special Instructions (Inst)

Always look for the * within the Inst and Admin Criteria fields.

This means that there is information that either needs to be reviewed or is required to be provided. Note: if you do not click on these fields, they will open after you click Done.

The screenshot displays the NEMEDTECH v5.64 MIS/27/SVH - TEST.POM application interface. The main window has a blue title bar and contains several panels:

- Review Patient's Orders**: A panel at the top with a light green background showing patient information: VIGS,BIG - 49/M, DOB 12/06/61, ADM IN, W1NR S109/02, U/A W800000163/W61000002149.
- Process Order set details**: A panel below the first one, containing navigation buttons like "Previous Set", "Next Set", "Previous Page", "Page 1 of 1", "Next Page", and action buttons like "Add More", "Clear Unchecked", "Edit Multiple", and "Save As Set".
- Modify/View Medication**: A modal dialog box in the foreground with a blue header. It contains a message "This order is ready to file." and detailed medication information for Heparin 25,000 UNIT/500 ML 25000 UNIT IV, Premixed at 25000 UNIT/500 ML. It includes fields for Route (IV), Rate/Dose (TITRATE), Directions, PRN Start (Y), and Stop. A red rectangle highlights the "Inst Admin Criteria" section, which shows a dropdown menu with "*" selected. Other tabs like "Taper", "Additives", "Fluid", and "Alt IV" are also visible.

At the bottom of the screen, there is a summary area showing the medication order: "+ Heparin 5000 UNIT/ML Inj 09/09 0530" and "IV ? UNIT (37.5 UNIT/KG) Q6HPRN PRN PER PROTOCOL". Buttons for "Done" and "Cancel" are located at the very bottom.

Ordering IV Fluids

Changing the Stop Date/Time

The default stop date/time on all IV fluid order strings is a 24 hours per hospital policy. If you wish to change this, you can do so by: 1.) total volume, 2.) number of bags to be given or 3.) stop date/time.

The screenshot displays a medical software interface with several overlapping windows. The top window, titled "Review Patient's Orders", shows patient information for "ADMIN, TEST - 56/F" with DOB "05/05/55" and admission date "W14N 1412/01". It also lists "DO NOT INTUBATE 5 ft 6 in 70.307 kg" and "Allergies/ADRs: Penicillins". Below this is a "Preview/Edit" window. The "Modify/View Medication" window is open, showing an order for "NS 1000 ML IV" with a rate of "100 ML/HR" and a stop time of "09/09 1529". The "Edit Rx Stop" dialog box is open in the foreground, prompting the user to "Define a Limit for this Rx:". It offers three options: "Total Volume to Infuse" (with a text input field and "(mls)" label), "# Bags/Doses" (with a dropdown menu), and "Stop Date/Time" (with a date/time selector showing "09/09 1529"). The dialog has "OK" and "Cancel" buttons. The background windows have "Done", "Cancel", and "Help" buttons at the bottom.

Antimicrobial Orders

Renewals (Clinical Indication)

You will be prompted to designate a clinical indication.

Your selection will affect the **renewal** period of the medication.

The screenshot shows a medical software interface with a window titled "PWM.VNE (NEMEDTECHB/TEST.5.64.MIS/395) - TEST,POM". The main window displays patient information: "SECONDTRY,ADMIN - 67/M", "DOB 04/04/44", "ADM IN", "W22S 2211B/01", "6 ft 2 in 80.739 kg", "U/A W800000059/W6100000911", and "Allergies/ADRs: No Known Allergies". A dialog box titled "Enter/Edit Rx's Clinical Indication" is open, showing a list of clinical indications for the medication "ceFAZolin 1 GM Premix 50 ML 100 ML/HR". The list includes: "<None>", "DOCUMENTED INFECTION (7 DAY)", "NO STOP- ONLY FOR PO", "SURGICAL PROPHYLAXIS (1 DAY)", "SUSPECTED INFECTION (3 DAY)", "<Clear>", and "<Cancel>". The dialog box also has a "Medication Ordered" field and a "Rate/Do" field.

Antimicrobial Orders

ID Restrictions

Some antimicrobials have ID restrictions associated. Depending on the restrictions, you will see one of two different types of admin criteria appear.

The screenshot shows a dialog box titled "Enter/Edit Rx's Administration Criteria". The "Administration Criteria" dropdown is set to "MEDICATIONS RESTRICTED TO ID". There are buttons for "Erase Admin Crit" and "Save as Favorite". The main area contains the text "*** Use Restricted to Infectious Disease ***". Below this are four input fields: "Approving ID Physician (F9 lookup)", "ID Resident/Fellow (free text)", "Indication (F9 lookup)", and "Other indication (free text)". An "Ok" button is at the bottom left.

This is an example of a med that always needs ID approval.

This is an example of a medication that may not need ID approval depending on the indication.

The screenshot shows a dialog box titled "Enter/Edit Rx's Administration Criteria". The "Administration Criteria" dropdown is set to "ID APPROVAL FOR ERTAPENEM". There are buttons for "Erase Admin Crit" and "Save as Favorite". The main area contains the text "Indications that do NOT require ID approval (F9 lookup)" followed by an input field. Below this is the text "** If indication not listed above, complete section below **". There are four input fields: "Approving ID Physician (F9 lookup)", "ID Resident/Fellow (free text)", "Indication (F9 lookup)", and "Other indication (free text)". At the bottom are buttons for "Ok", "Cancel", "Help", "Prev", and "Next".

Antimicrobial Orders

Trough Orders

When placing **initial** antimicrobial orders that require a trough, look in the Special Instructions field to review and/or place the trough instructions.

Note: all subsequent trough orders will have to be ordered in the lab section.

The screenshot shows a medical software interface with a patient's orders. The patient is SECONDTRY, ADMIN - 67/M, DOB 04/04/44, ADM IN, W22S 2211B/01, 6 ft 2 in 80.739 kg, U/A W800000059/W61000000911. Allergies/ADRs: No Known Allergies. The order is Vancomycin Inj (Vancocin Inj) 750 MG IV in D5W 150 ML, *Per Bag*. The order is circled in red. A pop-up window titled 'Edit Special Instructions' is open, showing the text: 'RN TO PLACE ORDER FOR VANCOMYCIN TROUGH 30 MINUTES PRIOR TO 4TH DOSE'. The pop-up has buttons for OK, Cancel, and Delete All. The background window has buttons for Add to Favorites, Monograph, and Show This Location.

This field must be checked on first lab order but then auto-populates for subsequent orders.

STAT REASON becomes required field only if STAT designated for lab.

Ordering Lab Tests

Next Morning Labs Short Set

Use the “Next Morning Labs” short order set to order labs for tomorrow morning.

The screenshot shows a software window titled "Review Patient's Orders" for "Sun, Sep 11". The patient information includes "CPOE, SEPTEMBER - 25/F", "ADM IN", "W14N 1406/01", and "U/A W800000165/W61000002164". Under "Allergies/ADRs:", it lists "Acetaminophen (From Tulenol)". The "Process Orderset details" section shows a list of order sets with "Next Morning Labs" selected. Below this, a list of lab tests is displayed, each with a checkbox and a pencil icon. A red arrow points to the checkbox for "BASIC METABOLIC PANEL 09/12 0700".

How Dietitians Communicate Recommendations

- ▶ Use Medical Nutrition Therapy Order Set
- ▶ Call physician for telephone order
 - ▶ Diet changes
 - ▶ Supplements
 - ▶ TF
 - ▶ Additional lab or vitamin recommendations
- ▶ Order implemented
- ▶ Order placed in queue for physician signature

Use the F9 Key to access drop down menus on open entries. Not sure if there is a drop down menu, just click F9 to check.

Co-signing Orders

Co-Signing Orders

Telephone and Verbal Orders

- ▶ Telephone and verbal orders are allowed based on SVH hospital policy.
- ▶ Verbal orders are restricted to rapid response and CODE BLUE scenarios. Please do not attempt to use verbal orders to avoid using CPOE.
- ▶ Telephone and verbal orders will trigger an electronic co-signature requirement.
 - ▶ Co-signature expectations are within 24 hours of order per hospital policy.

Co-Signing Orders

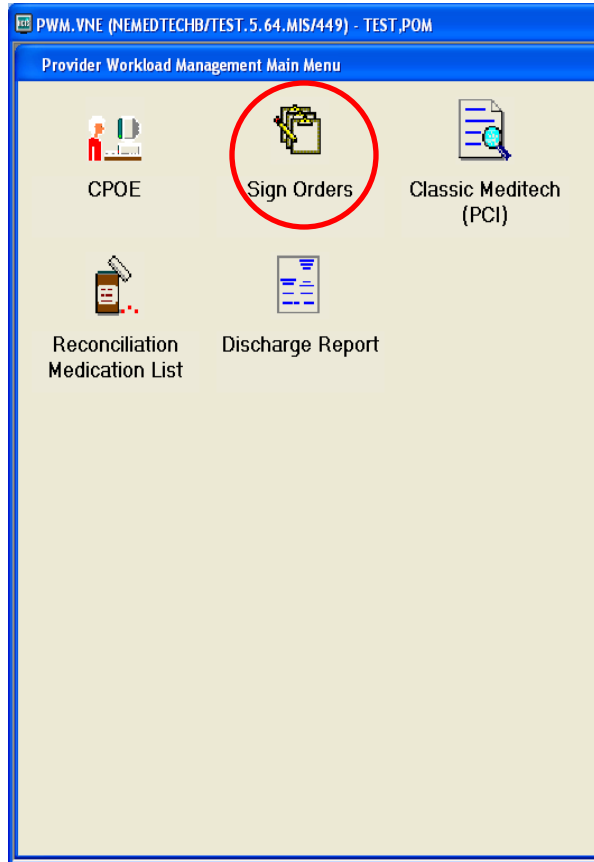

Telephone and Verbal Orders Workflow

- ▶ RN will need to sign-in from provider perspective and enter orders.
 - ▶ This allows RN to get decision support and alerts that provider would typically see.
 - ▶ The ordering provider will need to stay on the phone during a telephone order while RN encounters each alert and query.
 - ▶ The ordering provider will give answers to queries and, potentially, change order based on decision support.
 - ▶ In some cases, the ordering provider may find it more convenient to enter an order directly in CPOE due to nature of telephone orders.
- ▶ Expectation that at least 95% of all orders will be entered directly by provider into CPOE will help ensure that safety functionality of CPOE is realized.

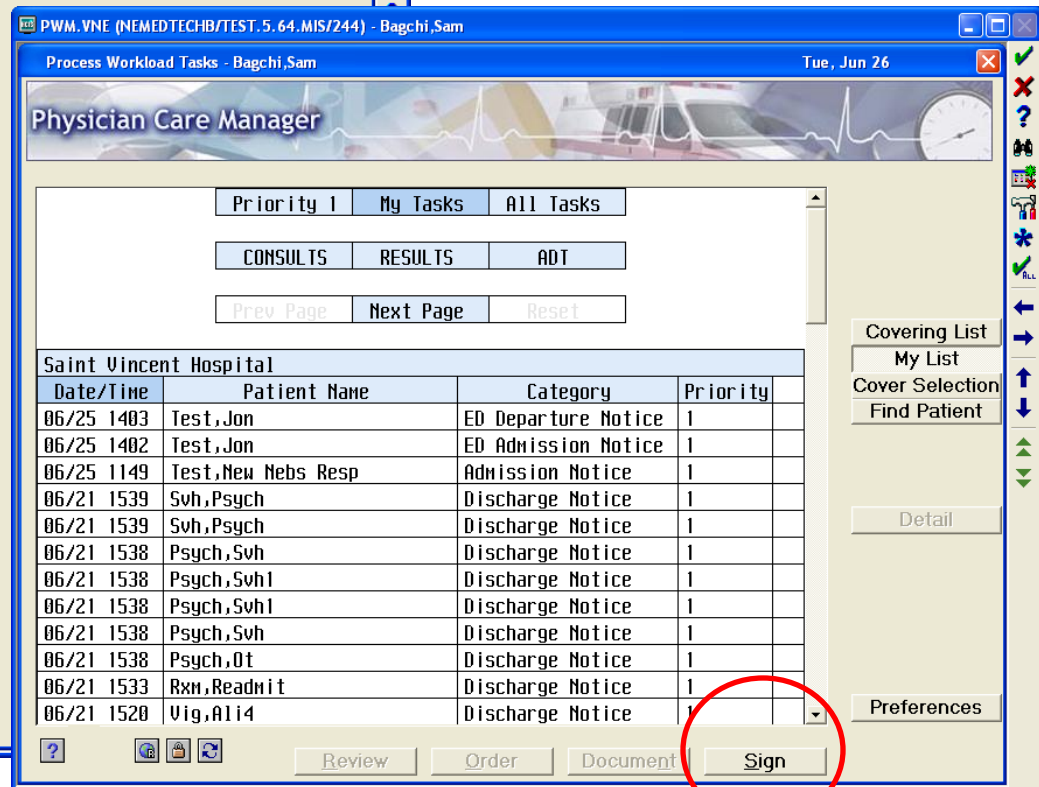

Co-Signing Orders

Signing Telephone and Verbal Orders

1. Click “Sign Orders” button

2. Click “Sign” button

Co-Signing Orders

Signing Telephone and Verbal Orders

3. Click “Orders” at the top of the screen to view telephone/verbal orders only
4. Check off order(s) you wish to sign then push Submit

5. The order detail is displayed
6. Push Sign to co-sign the order

The screenshot shows a medical software interface titled "PWM.VNE (NEMEDTECHB/TEST.5.64.MIS/189) - TESTRXM,TESTRXM". The main window is titled "Review Patient's Orders" and displays patient information: MED,REC - 56/F, ADM IN, W335 3306/02, U/A W800000498/W61000016842, and Allergies/ADRs: No Known Allergies. A list of medications is shown on the left, including Azithromycin Inj, Heparin, Aluminum Hydroxide/Magnesium Hydroxide, Metoclopramide, and Acetaminophen. A "Discharge Order" dialog box is open in the center, showing a calendar for January 2012. The date 01/05/12 is selected. The dialog box has fields for "Discharge Date:" and "Discharge Disposition:". A red arrow points to the "OK/Next" button in the dialog box. The main window has a right sidebar with buttons for "Allergies", "View/Change", "Renew/Repeat", "Hold", "Resume", "DC", "Undo", "Order Sets", "Orders", "Meds/Fluids", "Save as Set", "Notifications", "Cont from AMB", "Reconcile Meds", "Transfer", "Discharge", "Preferences", and "Submit". The bottom of the main window has buttons for "Review", "Order", "Document", "Sign", and "Return".

Discharge Process

Select “**Discharge Planning**” then click OK/Next

The screenshot shows a software window titled "Discharge Order" with a close button (X) in the top right corner. The window contains a form with the following fields:

Discharge Order	
Discharge Date:	01/13/12
Discharge Disposition:	Discharge Planning

Below the table is a section titled "Discharge Disposition:" with a list of radio button options. A red arrow points to the "Discharge Planning" option, which is selected. The other options are:

- ☐ AGAINST MEDICAL ADVICE
- ☐ ACUTE HOSPITAL
- ☐ ACUTE CARE SVH
- ☐ ADMIT/ER
- ☐ FEDERAL HOSPITAL
- ☐ CANCER HOSPITAL
- ☐ CHILDRENS HOSPITAL

At the bottom of the window are two buttons: "OK/Next" and "Cancel".

Use the F9 Key to access drop down menus on open entries. Not sure if there is a drop down menu, just click F9 to check.

- ▶ You will be prompted for Print Options
 - ▶ **Unclick** the Discharge Instructions Report (you cannot print them from here)
 - ▶ You can choose to print Prescriptions
 - ▶ The Printer should default to the local printer
 - ▶ If you do not wish to print right now, you can uncheck the options or push Cancel
- ▶ Sign any printed prescriptions

Discharge Process

Discharge Instructions – View Patient’s Copy

To print the version of the discharge instructions that the patient will be receiving, go back out to the main menu and click on the “Discharge Reports” icon

Discharge Process

Discharge Instructions – View Patient's Copy

Type your patient's name and then push Enter

If your patient's name doesn't appear in Blue immediately, push the Esc button on your keyboard

The screenshot displays a medical software interface with two windows. The background window is titled "OE.SVH (NEMEDTECHB/TEST.5.64.MIS/80/SVH) - TEST,POM". Overlaid on this is a "Patient Lookup By Name" window. This window has a "Select" dropdown menu and a table with the following columns: Name, Account #, Status, Date, Location, and Unit #. The table contains 10 rows of patient data. The second row, "TEST,MICHELE12", is highlighted in blue. Below the table is the text "<End of list>". Another window, titled "Print Discharge Instructions from RXM and NUR", is also overlaid. It contains a "Patient" label and a text input field with the value "TEST,MICHELE12".

SVH DISCHARGE INSTRUCTIONS
PLEASE BRING THIS FORM TO YOUR NEXT DOCTOR APPOINTMENT

HEART FAILURE EDUCATION

- * Diet: Eat a healthy diet. Limit the amount of salt in your diet and follow any additional instructions listed. Follow your doctor's directions about how much liquid to drink.
- * Weight: Weigh yourself at the same time every day. Call your physician if you have weight gain of more than 2 pounds in 2 days.
- * Activity: Unless otherwise advised by your doctor, match your activity to the amount of energy you have. Get plenty of rest.
- * Medications: Take medications as directed by your doctor. Do not take over-the-counter medications or stop taking medications without talking to your doctor first. Keep a written list of all medications you are taking. Be sure you understand why you take each medication.

Worsening Symptoms: Seek emergency assistance if you experience unrelieved chest pain or shortness of breath.

Call your doctor immediately if you have any of the following:

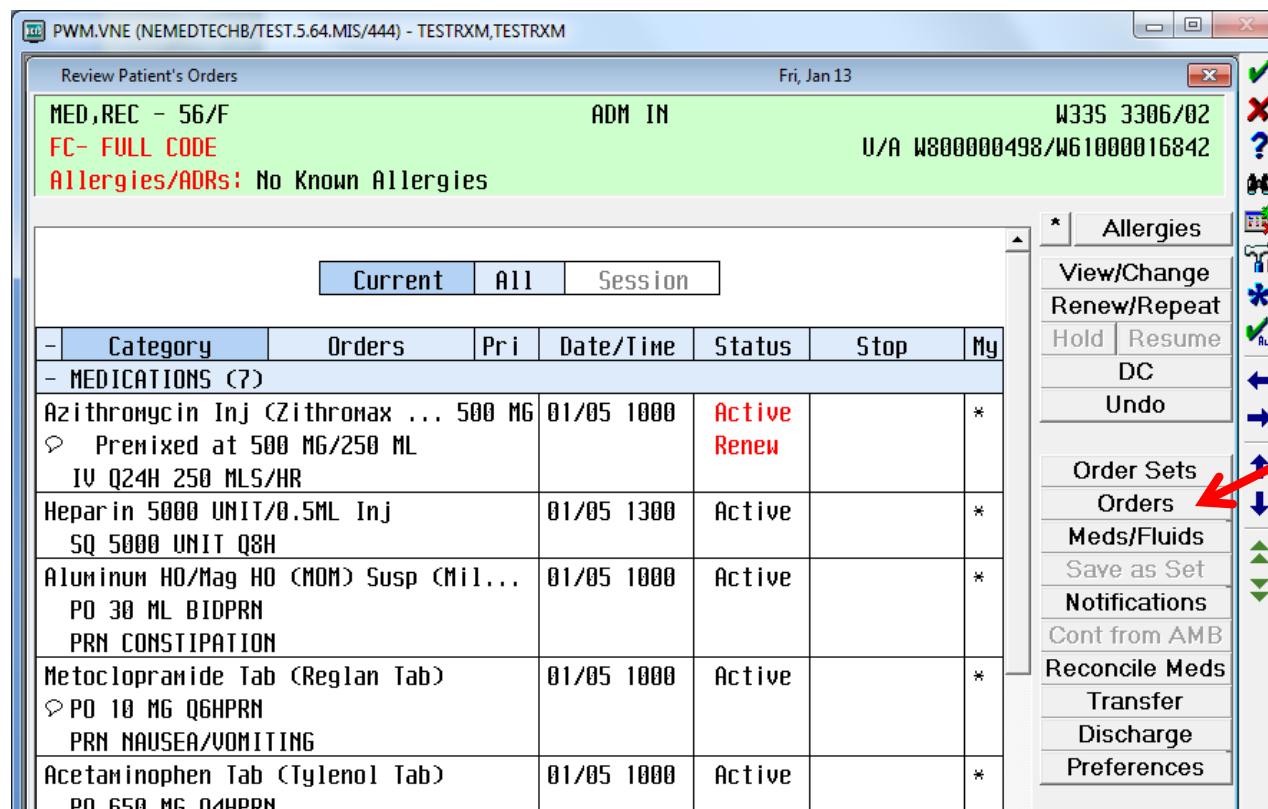

- * Increasing shortness of breath
- * Wheezing or cough
- * Unable to sleep or rest because of breathing problems
- * Feeling light-headed, dizzy or sweaty
- * Weakness or fatigue

Discharge Process

Cancelling Previous Discharge Instructions

If you made an edit to another author's discharge instruction, you should cancel that person's draft version.

1. Go back into Discharge Routine and click on gray pencil beside Reports
2. Choose the Draft

The screenshot shows two windows from a medical software application. The left window, titled 'Review Patient's Orders', displays patient information for 'TESTPHA, DUKE - 65/M' and a list of orders. The 'Reports (2)' entry is highlighted with a red arrow. The right window, titled 'Document', shows a table of discharge instructions. The 'Draft' status in the table is highlighted with a red arrow. A large blue arrow points from the 'Reports (2)' entry in the left window to the 'Draft' status in the right window.
